Industry: Steel production industry

Highlighted products: EcoRolls, A-LOC

Length: 480 characters

SCHAAF introduces revolutionary progress in steel wire production with **EcoRolls**, the reusable compaction roller and **A-LOC**, the removable axial roll ring locking system. An increase in efficiency by reducing downtime as well as an enormous quality intensification due to improved end results is guaranteed when using this high pressure hydraulic technology.

Through their durable and precise capability these tried and tested high-tech products present a technical novelty.
