

Leading joining technology

# SCHAAF

Your partner for innovative solutions

**SCHAAF** – Product quality and  
cooperation just as you like!

## Leading joining technology by SCHAAF

### 20,000 m<sup>2</sup> for High-Pressure Hydraulic Technology up to 4000 bar

SCHAAF is an international group of enterprises with home-base in Germany that has specialised in the development and production of joining technologies since 1954. The globally active company thrives on its innovative system solutions and convinces with excellent quality.

SCHAAF develops and manufactures Hydraulic High-pressure Tools, Bolt Tensioners, Hydraulic Nuts, various Connecting Bolts as well as shafts and axles connections. Moreover SCHAAF offers the patented and certified TTG with increased lifetime.

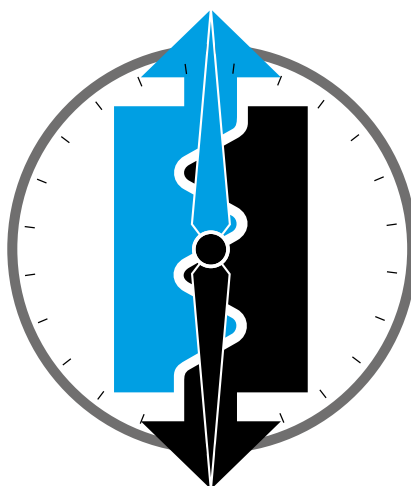

The Vision statement is focused on tomorrow and what we would like to become. It sets our company the direction where to go.

## VISION

**We develop world leading technology in the field of joining technique and thereby inspire our customers. Together we hereby create a future in which material will be saved, resources will be sustained and life will be easier.**

The Mission statement is focused on what, and why we are doing that today. It drives the company towards the Vision. Every piece of the mission is to stay on the track to reach our Vision.

## MISSION

**We create value to our customers in all kinds of industries and offer cooperation in the way they like it.**

## Locations

### SCHAAF Germany

What originally started with a modest production facility and just three office rooms has evolved into an impressive manufacturing of over 20,000 m<sup>2</sup> over the past forty years. The construction of our Plant 3 in 2023 marks a significant milestone in SCHAAF's history.

This decisive step has not only doubled our production capacities, but also enables us to produce simultaneously at three plants, all located in Erkelenz. Here we continue our production of high-quality tools and equipment.

Our highly modern machinery, in-house testing facilities and an efficient dispatch centre form the backbone of our manufacturing processes. In addition, our in-house joinery and high volume production capabilities give us the flexibility and versatility needed to meet the demands of the future.

A rigorous quality management system is seamlessly integrated into all aspects of our production to ensure that every product that leaves our facilities meets the highest quality standards.

With these three impressive locations, we are well equipped to meet upcoming challenges with confidence and innovation. SCHAAF stands for quality, precision and the continuous pursuit of excellence - and our locations are proof of our daily commitment to these values.

### SCHAAF China

After the successful expansion of the sales network in the Near East, SCHAAF (Taicang) Co. Ltd was founded in 2007. Under strict quality requirements according to German standards, SCHAAF products have been produced especially for the Chinese market since 2011 on around 700 m<sup>2</sup>. This reduces the costs because there are no transports from Germany and the express delivery capability in Asia is increased.

### FASTEC Switzerland

The SCHAAF Group has included FASTEC AG, based in Altdorf, since 2010. The production facility is equipped with the precision of state-of-the-art machines that is well known in Switzerland. FASTEC specialises primarily on the SCHAAF TTG-Technology, which is a patented process for manufacturing threads in nuts or on bolts with 100% flank contact over the complete area.

## Milestones

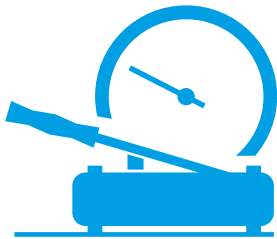

**Know-how paired with High-Tech – the best foundation for successful systems.**

- 2023** Expansion to 20,000 m<sup>2</sup> (Plant 3)
- 2022** Series supplier for GE Haliade-X wind turbines (>12 MW power) with TTG Bolts and Nuts
- 2021** Thread rolling machine for fast, precise and increasing fatigue strength production of TTG and DIN thread bolts
- 2021** First 24/7 automated production line for large series production
- 2020** SCHAAF TTG joining elements for 111 turbines for a chinese offshore wind turbine manufacturer
- 2020** Expansion to 10,000 m<sup>2</sup> (Plant 2)
- 2019** TTG Bolts and Nuts for the biggest crane Liebherr has ever built with a bearing diameter of 17,190 mm
- 2019** ExpaTen QL for all V164 and V174 Turbines (8,5-10 MW)
- 2018** 1st use of the Bolt Robot after only 3 months development time
- 2015** Order for the world largest forging press (mounting tools) 550MN
- 2013** Establishment of SCHAAF Service GmbH
- 2010** Takeover of Fastec AG, Switzerland
- 2007** Start and Expansion SCHAAF China in Taicang
- 2005** Expansion to 4,000 m<sup>2</sup>
- 1977** Company established by Martin Schaaf
- 1954** First Bolt Tensioners, designed by Martin Schaaf at the company Wirth

## Hydraulic high pressure service

SCHAAF Service GmbH offers comprehensive support for our products, with a strong emphasis on quality, reliability, and precision. Our expertise lies in offering complete Hydraulic High-Pressure services directly from the product manufacturer, ensuring the highest level of assistance and performance. From assembly to operation, we provide support throughout the entire process. Additionally, SCHAAF Service offers worldwide maintenance and repair services as needed.

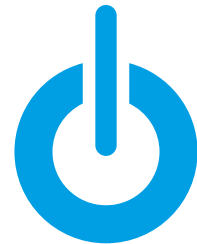

### Assembly

SCHAAF Service handles the global assembly and disassembly of products and systems, including their overhaul.

### Maintenance

In addition to installation and removal, SCHAAF Service also takes responsibility for the regular maintenance of existing products and tools.

### Installation

We provide professional installation and setup services for the corresponding or required software.

### Repairs

Our professional team performs prompt repairs for all product and tooling problems, ensuring efficient worldwide support.

### Instruction

Our experts provide specific instructions to customers and employees, ensuring the safe and efficient operation.

### Trainings

SCHAAF Service offers comprehensive training programs for application and maintenance of our own products as well as external ones.

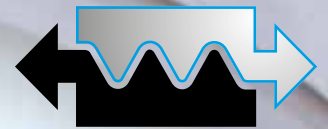

Offshore converter station

Forging press

Ship-shaftline installation

### Service by SCHAFF

- Worldwide support
- Quality, reliability and precision
- More than 50 years experience with hydraulic high-pressure tools
- Mounting, demounting, maintenance, installation and repairs
- Instructions and trainings for safe and high efficient operation

## Unique features

Innovative partner of the industry!

### Technical Design

Own design office with CAD, FEM, CAM and Design on Demand workstations

### Consulting

Through our specialist engineers and technicians as well as worldwide on-site representations

### Own production

95% in-house production, CAM and PPS supported

### Service

Worldwide commissioning support and Maintenance measures

### Training

Internally and externally by specialist staff

### **Documentation**

According to the necessary guidelines and customer requirements

### **Quality assurance**

Through a quality management representative as well as 100 % worker self-control; the entire company is certified according to DIN EN ISO 9001:2015.

### **Test benches**

95% in-house production, CAM and PPS supported

### **Testimonials and tests**

According to customer requirements and in-house testbenches for many products

### **Warehousing**

24 hour express service for all stock items and almost all parts that need to be manufactured

## Turnkey solutions for your business

Product quality and cooperation as you wish!

SCHAAF is your contact partner right from the project planning stage in order to achieve the best possible result. In-house production and possible assembly ensure a smooth workflow.

1

### Development

Customer-oriented solutions with SCHAAF technology

2

### Production

SCHAAF in-house production facilities for optimal quality management.

3

### Mounting

SCHAAF Service offers support with assembly, on-site training and maintenance.

General mechanical engineering

Windenergy

Hydroenergy

Powerplant technology

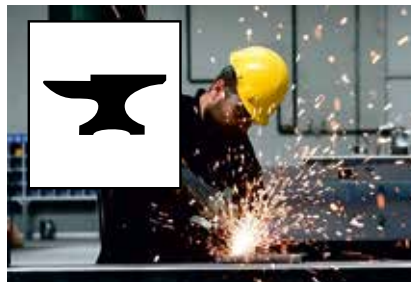

Engines and gearboxes

Shipbuilding

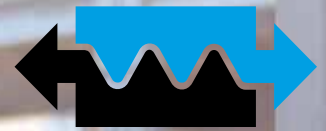

Cranes and construction machinery

Metal industry

Chemical industry

### Key solutions

- Patented joining technologies for the entire industry
- System provider with own development department
- Many years of experience with hydraulic tensioning tools
- Support in the planning phase for optimal and cost-reducing results
- 100% system solution through coordinated accessories
- Renowned certifications, including ISO 9001

## SCHAAF TTG-Technology

### Bolts and nuts of the future

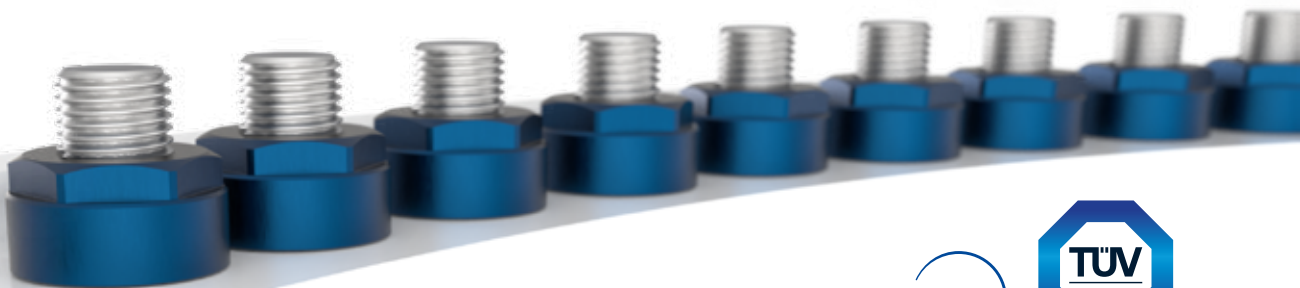

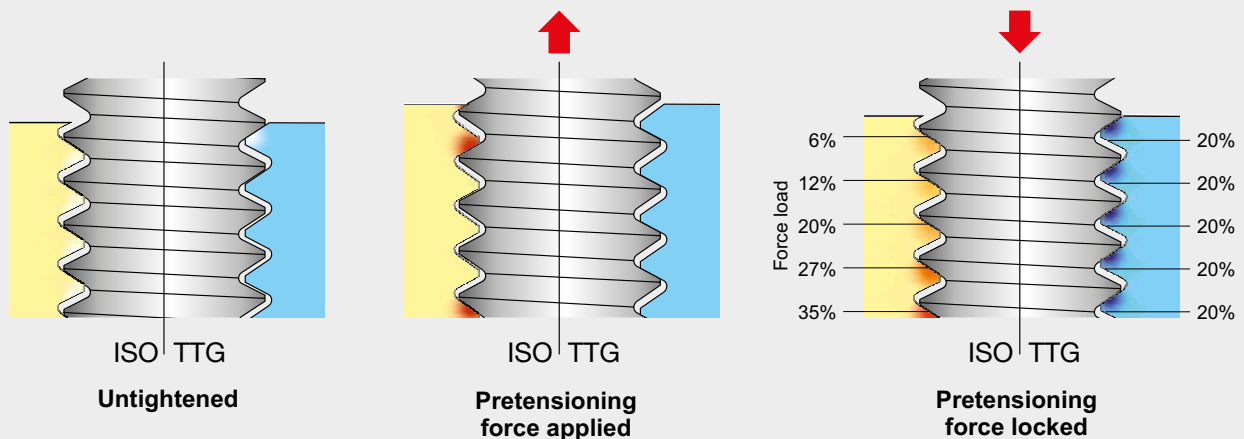

The TTG patented by SCHAAF has been studied extensively in several test procedures by the Fraunhofer-Gesellschaft as part of its technology research and has been awarded internationally valid certificates.

## TTG

### Targeted equal force in the thread area

TTG, a patented manufacturing process for creating threads in nuts or on bolts ensures optimum fitting accuracy in the thread when tightened. This innovative method not only enhances durability but also enables bolts with TTG to withstand significantly higher loads. Consequently, the connection diameter can be reduced, leading to substantial material savings. Threads featuring TTG revolutionize connection possibilities and offer cost-saving benefits.

## Tooling

### Bolt Tensioning techniques up to 4000 bar

**SSV**

#### **Bolt Tensioner** Axial Bolt tensioning using a removable tool

Torsion-free generation of axial tensioning force – Economical use of bolt material capacity from size M8 to S1000 and bigger.

**HM**

#### **Hydraulic Nuts** Axial Bolt tensioning using a hydraulic nut that stays on the bolt-connection.

Torsion-free generation of axial-tensioning force. Quicker tightening and loosening of your connection for regular maintenance – compared to Bolt Tensioner.

**PG 48**

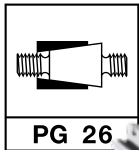

#### **Multiple Stud Nut** Axial bolt tensioning using torque (MSN)

Simple option to achieve torsion-free axial tensioning force with increased mounting effort. The MSN replaces the standard nut in a bolted connection.

## Joining Elements

Shaft and axle connections up to 4000 bar

### ExpaTen

#### The Perfect Fastening Bolt

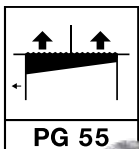

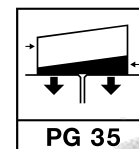

ExpaTen bolts not only provide a 100% non-positive and form-fitting connection for transferring high torque, but they can also be easily disassembled and reused even after enduring high levels of stress. These bolts ensure a safety advantage of 5 compared to regular bolt torque transmission.

### GripLoc

#### The Optimal Shaft Coupling

GripLoc couplings offer the ideal solution for connecting two shafts through radial shrinking. With our specially patented design, customers can confidently mount and dismount the coupling, backed by a lifetime guarantee.

### GripCon

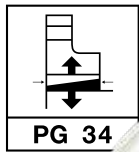

#### Radial force transmission in unreachable never seen before compactness

SCHAAF GripCon are made of heat-treated steel and allows our customer to save a lot of material/weight in their connection.

## Joining Elements

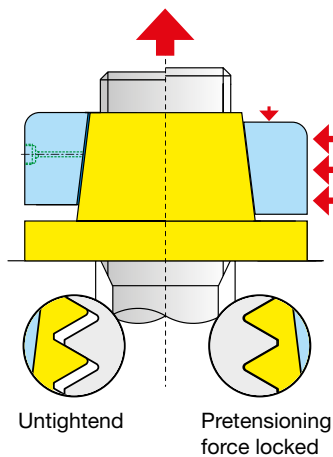

Shaft and axle connections up to 4000 bar

### ExpaHub

**The Optimum Connection for Shafts and Hubs**

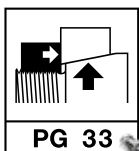

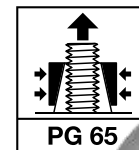

ExpaHub enables the seamless connection of two cylindrical parts, combining cylindrical inner and outer diameters. This connection allows for the transmission of high torque while ensuring easy disassembly and reassembly.

### ShrinkNut

**The Maintenance-Free Bolt Connection with TTG**

ShrinkNut is effortlessly installed using a hydraulic tool and clamped onto the bolt. It serves as the perfect nut for vibrating connections, eliminating the need for welding and enabling easy disassembly when required.

### Oil press fit

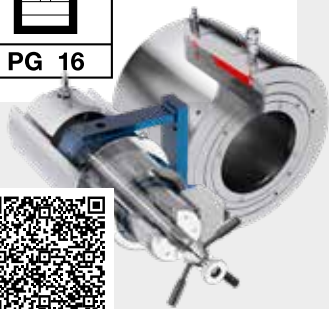

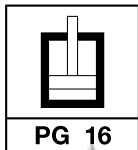

**Hydraulic nut for oil press fit installation**

100% customised hydraulic nut for different applications. The dimension, force and pressure can change to customer wishes.

## Joining Elements

Custom Solutions in High-Pressure Hydraulic Technology up to 4000 bar

### Custom Solutions

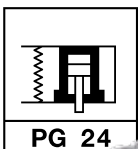

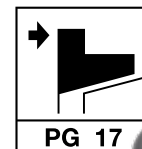

#### High-Pressure Cylinders

Our expertise lies in customizing high-pressure cylinders with a wide range of functionalities, including weight reduction, short stroke, long stroke, hollow cylinders, lifting cylinders, and cylinders designed for extreme loads. Our goal is to provide tailored solutions that address the specific requirements of our customers. Our aim is to support our clients in solving their challenges by delivering specialized designs that cater to their individual needs.

### Hydraulic Mounting and Dismounting Devices

Customized and standardized mounting and dismounting devices for hubs on conical or cylindrical shaft seats.

### Clamping Nuts

Clamping Nuts are customized and can be used in systems that require quick clamping features or as overload limiters.

The distinguishing feature of SCHAAF Clamping Nuts is that several cylinders are arranged on a ring structure and that these are either clamped or released by hydraulic pressure.

### Quality management

- All products are checked for material quality, dimensional accuracy, proper operation, and pressure resistance
- Quality assurance measures during order execution
- Each product is delivered with detailed documentation
- SCHAAF products and services comply with national and international norms and standards, legal regulations and specific customer requirements

## Product Extensions

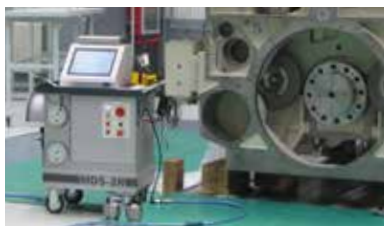

### Pumps and High-Pressure Units, Accessories

#### Hand Lever Pumps

Hydraulic pressure up to 4000 bar

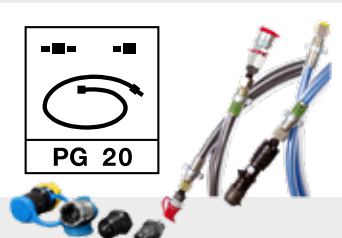

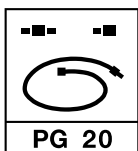

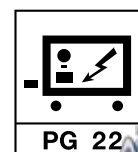

The hand lever pumps are designed and produced by SCHAAF. The extremely rugged design ensures a long service life. All pumps are therefore perfectly suited for rough conditions at workshop or field.

#### High-pressure Units

Pressure up to 4000 bar

Electric and air driven pump units for workshops and field applications. 100% designed and produced by SCHAAF with optional software for documentation of the complete bolting process.

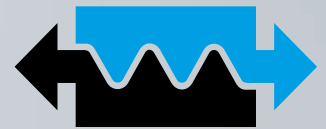

#### Accessories

Nipple, adaptor, hoses, gauges

SCHAAF designs and manufactures all needed hydraulic high pressure accessories to connect and pressurize the tools with the high pressure pumps.

## **Simplifying Complexity, Emphasizing Significance!**

### **Exemplary quality management throughout the production process**

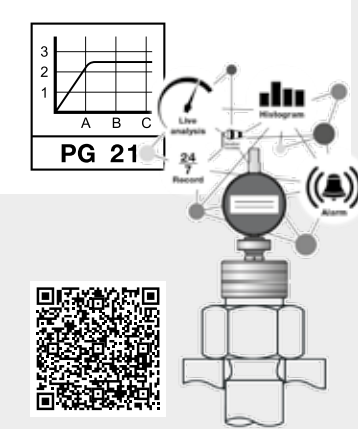

At SCHAAF GmbH & Co. KG, our commitment to quality can be felt and seen in every aspect of our production process. Our unwavering dedication to consistency within our company is the reason for our stakeholders strong trust. Our philosophy is rooted in the diligent implementation of a comprehensive quality policy and a continuous drive for improvement. Strong principles and implementation of highest quality standards and targets are deeply ingrained within our organization. They ensure that SCHAAF products and services consistently meet the requirements of national and international standards, regulatory frameworks, and the specific needs of our esteemed customers.

Customer centricity is paramount at SCHAAF GmbH & Co. KG. to understand and fulfill our customers' desires and requirements is especially important to us. Safety, functionality, reliability, performance, health considerations, environmental sensitivity, comfort, design, materials, delivery time, service life, serviceability, and maintenance are critical parameters guiding our efforts to swiftly and flexibly offer and deliver the ideal solutions for our customers.

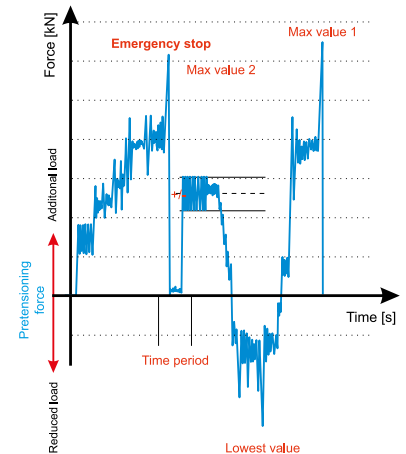

## Product Extensions

IoT / Software solutions for High-Pressure Hydraulic Technology up to 4000 bar

**OBLM**  
**Online Bolt Load Monitoring**

A measuring solution to control and measure the bolt force during operation in real time. Software incl. hardware

### FSTS

**SCHAAF solution for a Tower Flange Stud Tensioning System**

The design of our tools is focused on simplicity, aiming to achieve cost reduction and intuitive operation for the user. One example of this approach is the absence of additional motors for tool operation. Instead, we incorporate a standard cordless screwdriver system for seamless functionality.

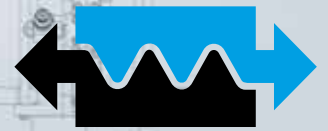

**Software development**

Individual software solutions for controlling, monitoring and documentation of bolt connections including the tensioning process.

**TSI / TMS**  
Maintenance monitoring of hydraulic tools. Operation and maintenance monitoring of hydraulic tools and aggregates

## **Schemata, tables, diagrams**

### **Principle of Schemata**

As supplier of complete systems, we as SCHAAF regard ourselves obliged to be our customers' consultant in all aspects of bolt tensioning. Therefore, we produce various schemata, tables, diagrams and calculations on your request. These could be, for example:

- Tables for the sequence of tightening bolts in several steps
- Thread calculations -> tolerance considerations
- Flank clearance calculations
- Pressure-Force-Diagrams
- Flow charts
- Customized documents

## Quality conscious action

### Continuous improvement

#### Personnel Management at SCHAAF: Driving Efficiency and Quality Consciousness

At SCHAAF, our personnel management is guided by the conviction that only qualified and quality-conscious employees can ensure high efficiency in product development and manufacturing. Each member of our staff plays a vital role in achieving the company's goals and is committed to continuous improvement in both thinking and performance. To facilitate this, our executive management provides every staff member with the necessary freedom and training to meet requirements, maintain the quality management system, and continually enhance the company's operations. In doing so, we establish and maintain lasting customer trust in the capabilities of SCHAAF, solidify our position as an industry leader, and ensure long-term job security.

#### Quality Management: Establishing a Convincing Quality Image

To achieve the best possible outcomes for our customers and secure the company's existence and success, SCHAAF's management places a strong emphasis on the quality of daily performance, internal and external collaboration, and the resulting products and services. The quality of all SCHAAF products is meticulously planned, executed, and certified. Our continuously updated quality management system, monitored and evaluated by the executive management, reinforces our commitment to quality and contributes to the outstanding reputation of our company. SCHAAF products of superior quality are approved for application and delivered to customers only when they have successfully met the requirements to the fullest extent.

## Focus on SCHAAF

Know-how paired with High-Tech – the best foundation for successful systems.

**SCHAAF GmbH & Co. KG**

Bruesseler Allee 22
